SYNERGY
CHIMNEYS TECHNOLOGY

Synergy s.r.l., con sede a Mondovì, si distingue nella produzione di canne fumarie in acciaio inox e rame, accessori per fumisteria e tubi per stufe a pellet e a legna. L'azienda si impegna costantemente per offrire standard di qualità elevati e affidabilità, e si distingue per l'utilizzo di tecnologie all'avanguardia per la fabbricazione di condotti per l'evacuazione dei gas della combustione, ventilazione, aspirazione e aria condizionata, anche con l'impiego di materiali innovativi. La combinazione di alta qualità dei materiali e tecnologia avanzata nei macchinari di produzione rappresenta sempre una garanzia di lunga durata e affidabilità.

DISPONIBILE SU Google Play

Synergy S.r.l., con radici profonde nella città di Mondovì, si distingue come produttore d'élite di canne fumarie e soluzioni per fumisteria. La nostra specializzazione si estende nella lavorazione di acciaio inox e rame, dando vita a canne fumarie di eccellenza, accessoristica di precisione e sistemi avanzati per stufe a pellet e a legna.
L'engagement della nostra azienda verso l'eccellenza si manifesta nella selezione rigorosa dei materiali e nell'adozione di tecnologie all'avanguardia. Ci siamo affermati come esperti nella creazione di condotti per lo smaltimento dei gas di combustione e sistemi di ventilazione, aspirazione, e aria condizionata, privilegiando l'uso di materiali innovativi. L'impegno nella qualità e l'avanzata tecnologia dei nostri macchinari si traduce in prodotti di durata superiore e affidabilità incontestabile.

Il fiore all'occhiello dell'esperienza Synergy è la nostra app intuitiva, attraverso la quale i clienti possono richiedere preventivi personalizzati con facilità. Configura il tuo ordine selezionando quantità, dimensioni, colori disponibili e specifiche tecniche conforme alle normative vigenti. Il nostro servizio clienti è pronto a rispondere con un preventivo dettagliato e personalizzato, inviato direttamente via email.
All'interno dell'applicazione troverai anche l'accesso agevole al nostro catalogo completo in formato PDF e un'esposizione trasparente di tutte le nostre certificazioni, testimoniando il nostro impegno verso l'eccellenza e la fiducia nei nostri prodotti.
Per iniziare la tua esperienza con Synergy e scoprire la nostra gamma completa di soluzioni di fumisteria, scarica l'app e visita il nostro sito www.grupposynergy.com. Con Synergy, la qualità, l'innovazione e l'assistenza specializzata sono sempre a portata di mano.

QUADRO NORMATIVO

Riferimenti normativi per la conformazione e il dimensionamento

Nelle tabelle sottostanti, vengono riportati i riferimenti normativi per la progettazione dei sistemi di scarico dei prodotti della combustione per apparecchi alimentati a gas metano o a combustibile solido. A seconda del combustibile, c'è un'ulteriore suddivisione riguardante la tipologia di apparecchio e la potenza, che porta quindi a identificare le specifiche norme di riferimento per quanto riguarda la conformazione (costruzione della composizione moduli come ispezioni, "T", riduzioni, gomiti, etc.) e il dimensionamento (metodo termo-fluidodinamico tramite il quale è possibile verificare la corretta sezione del sistema di scarico dei fumi). L'obbiettivo di tale classificazione, consiste nell'indirizzare la progettazione, nei singoli e rispettivi casi, verso strumenti il più possibile adeguati.

	senza guarnizioni diametri 350 - 500 mm	Canale da fumo EN 1856-2 - T600-N1-D-V2-L50060-G(600) M Condotto fumario EN 1856-2 - T600-N1-D-V2-L50060-G
MONOTEC BLACK Condotto fumario e canale da fumo monoparete in acciaio inox rivestito con vernice di colore nero	con guarnizioni diametri 80 - 100 mm	Canale da fumo EN 1856-2 - T200-P1-W-V2-L50050-O(50) M Condotto fumario EN 1856-2 - T200-P1-W-V2-L50050-O

DISTANZE DAI MATERIALI COMBUSTIBILI DEI SISTEMI DI CAMINO.

Nel caso di sistemi di camino, le distanze dai materiali combustibili riportate nelle precedenti tabelle si applicano fino a diametri interni di 300 mm. Per sistemi di camino aventi diametro interno superiori a 300 mm si applicano i seguenti coefficienti correttivi:

- *per diametri interni compresi tra 301 e 450 mm moltiplicare la distanza per 1,5;*
- *per diametri interni compresi tra 451 e 600 mm moltiplicare la distanza per 2;*
- *per diametri interni superiori a 600 mm moltiplicare la distanza per 4.*

GRUPPO SYNERGY OFFRE LA POSSIBILITA' DI DIMENSIONARE E DISEGNARE LE CANNE FUMARIE //

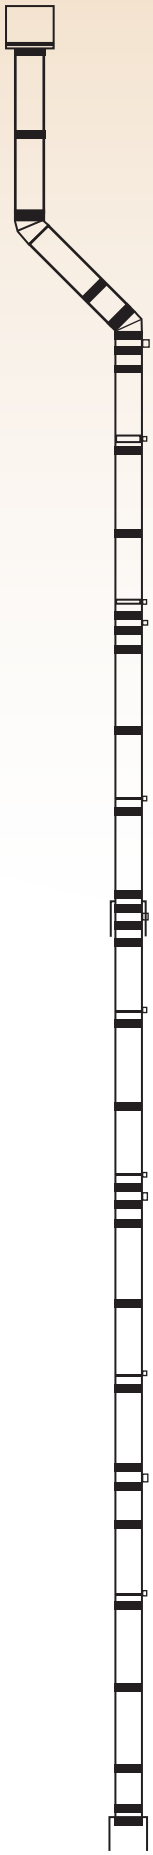

DETTAGLI

// La progettazione ottimale di una canna fumaria è cruciale per garantire l'efficienza e la sicurezza del sistema di riscaldamento. Questo processo comprende la determinazione delle specifiche tecniche, come sezione, forma e lunghezza, sulla base delle normative tecniche rigorose, in particolare la UNI EN 13384-1.
Un design accuratamente calcolato non solo assicura che i prodotti della combustione siano evacuati efficacemente ma influisce anche positivamente sulla trazione della canna fumaria, il che è essenziale per il funzionamento ottimale dei caminetti o delle stufe. Una canna fumaria ben progettata contribuisce significativamente alla prestazione del sistema di riscaldamento, riducendo i rischi di malfunzionamento e aumentando l'efficienza energetica.

Per progettare la canna fumaria ideale, è essenziale avere a disposizione dati accurati dell'impianto termico e dei materiali impiegati per l'evacuazione dei fumi. Un'analisi dettagliata e meticolosa è indispensabile per assicurare che il dimensionamento rispetti i criteri tecnici e le normative vigenti.
Se sei pronto a iniziare questo processo essenziale, ti invitiamo a scaricare e compilare il modulo di dimensionamento. Una volta completato, invia i moduli all'indirizzo email ordini@grupposynergy.com per procedere con il tuo progetto.

SYNERGY
CHIMNEYS TECHNOLOGY

DETTAGLI

Il dimensionamento di una canna fumaria richiede l'osservanza di normative:

- Valutazione dell'impianto e del combustibile: Bisogna conoscere il tipo di apparecchio a cui la canna fumaria servirà (caldaia, camino, stufa, ecc.), la potenza termica, il tipo di combustibile utilizzato e la temperatura dei gas di combustione.

- Verifica delle normative: Ogni paese ha norme specifiche per il dimensionamento delle canne fumarie (ad esempio in Italia, la norma UNI 10683 per camini domestici). Queste norme stabiliscono i requisiti minimi per il tiraggio, l'altezza, il diametro e i materiali.

- Definizione del tiraggio necessario: Il tiraggio è la forza che induce il movimento ascensionale dei fumi. Dipende dalla differenza di temperatura tra i gas all'interno della canna e l'aria esterna, dall'altezza della stessa canna e da altri fattori aerodinamici. Un tiraggio insufficiente può portare a problemi di riflusso dei gas di combustione, mentre un tiraggio eccessivo può comportare un'inefficiente combustione e un maggiore consumo di combustibile.

- Calcolo del diametro: Utilizzando formule specifiche, si calcola il diametro interno ideale della canna fumaria, che dipende dal volume di gas emessi dall'unità di riscaldamento e dalla loro velocità ottimale di evacuazione.

- Altezza della canna fumaria: Dev'essere sufficiente per garantire un buon tiraggio. La normativa prevede di solito una altezza minima, che può variare in funzione di fattori come la posizione geografica e l'ambiente circostante. Una canna troppo corta potrebbe non garantire il tiraggio necessario, mentre una troppo lunga potrebbe condurre a un eccessivo raffreddamento dei fumi con condensazioni indesiderate.

- Isolamento e Materiali: Una canna fumaria deve essere costruita con materiali in grado di resistere alle alte temperature e agli attacchi chimici dei fumi. L'isolamento contribuisce a mantenere alta la temperatura interna, prevenendo condensazioni e migliorando il tiraggio.

- Installazione: È importante seguire le raccomandazioni specifiche per l'installazione, come la pendenza, l'uso di curve (che devono essere limitate per non ostacolare il passaggio dei fumi) e il mantenimento di distanze di sicurezza da materiali combustibili.

- Verifiche e controlli: Dopo l'installazione, e periodicamente nel tempo, si devono effettuare verifiche della funzionalità della canna fumaria (controllo del tiraggio, analisi della combustione, ispezioni visive per rilevare eventuali danneggiamenti o ostruzioni).

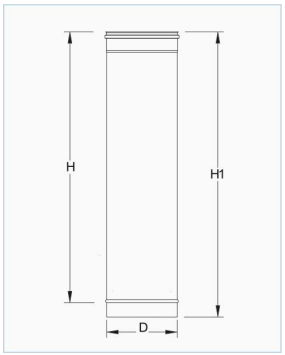

MONOTEC 316L

Il sistema MONOTEC 316L è composto da elementi a sezione circolare in parete singola realizzati in acciaio inox 316L, con uno spessore minimo di 4/10 e finitura BA. Gli elementi sono dotati di innesto Maschio/Femmina a bicchiere, con guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio fornita su richiesta. Le temperature massime di esercizio sono: 200°C con guarnizione e 600°C senza guarnizione.

MONOTEC 304

Il sistema MONOTEC 304 è costituito da elementi a sezione circolare in parete singola realizzati in acciaio inox 304, con uno spessore minimo di 4/10 e finitura BA. Gli elementi sono dotati di innesto Maschio/Femmina a bicchiere, con guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio, disponibile su richiesta. Le temperature massime di esercizio sono: 200°C con guarnizione e 600°C senza guarnizione.

VENTILAZIONE

MICROFORATO

La canalizzazione microforata è costituita da elementi a sezione circolare in acciaio inox, lamiera zincata o verniciata, utilizzati per la diffusione dell'aria. Questi canali microforati sfruttano il principio di diffusione dell'aria ad induzione, con l'obiettivo di mantenere costante l'effetto di "comfort" nell'ambiente in cui sono installati.

MICROFORATO

Una canna fumaria in inox microforato è un tipo di condotto utilizzato per evacuare i fumi da apparecchi di riscaldamento come stufe, caminetti o caldaie. È composta da acciaio inossidabile, che è una lega resistente al calore e alla corrosione, rendendolo un materiale ideale per questo tipo di applicazione.

MICROFORAZIONE

La microforatura si riferisce a una serie di piccoli fori praticati nell'acciaio. Questi fori hanno lo scopo di migliorare la dispersione del calore lungo la superficie della canna fumaria e di permettere una certa "respirazione" del materiale. A seconda del design, possono anche servire per diminuire il rischio di condensa all'interno del condotto, migliorando la ventilazione e permettendo all'umidità di evaporare più facilmente.

MATERIALE

L'acciaio inossidabile usato è spesso della qualità 304 o 316, con il grado 316 che offre maggiore resistenza alla corrosione, qualità importante soprattutto se la canna fumaria viene esposta a condizioni meteorologiche avverse o a fumi acidi.

VERNICIATURA SYNERGY

Presso di noi è disponibile il servizio di verniciatura per tutti i nostri sistemi fumari. Il sistema SYNERGY assicura la durabilità della verniciatura nelle linee MONO PARETE fino a una temperatura massima di 180°C.

VERNICIATURA

DAL D.080 AL D.250 EFFETTIVO = PREZZO D'AUMENTO X
DAL D.300 AL D.350 EFFETTIVO = PREZZO D'AUMENTO Y
DAL D.400 IN POI = PREZZO D'AUMENTO Y

Per informazioni relative al prezzo di aumento contattare l'agente di riferimento.

5000 PA

Il sistema 5000 PA è un camino in acciaio inox MONO e DOPPIA parete coibentata progettato per applicazioni civili ed industriali, grandi impianti di riscaldamento e evacuazione fumi. Questo sistema offre prestazioni eccezionali in termini di tenuta alla pressione (designato H1 5000Pa) e alle alte temperature, garantendo anche una resistenza superiore alla corrosione (designato V2).

AUTOPORTANTI

Il sistema AUTOPORTANTE è un camino strutturalmente indipendente, progettato per situazioni in cui non è possibile ancorare il camino a pareti, tralicci o pali esistenti. Questo tipo di struttura è adatto per tutte le tipologie di combustione in conformità alle normative vigenti, offrendo flessibilità sia per motivi tecnici che estetici.

CHIMNEYS TECHNOLOGY

DOPPIA PARETE INOX 316/304 SP 25

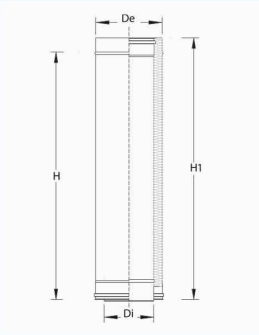

TERMOTEC 316L

Il sistema TERMOTEC è composto da elementi a sezione circolare in parete doppia, con la parte interna realizzata in acciaio inox 316L e la parte esterna in acciaio inox 304 con finitura BA. Questi elementi sono dotati di innesto Maschio/Femmina a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio, disponibile su richiesta. Inoltre, l'intercapedine circolare è rivestita da lana di roccia ad alta densità. Le temperature massime di esercizio sono: 200°C con guarnizione e 600°C senza guarnizione.

TERMOTEC RAME

Il sistema TERMOTEC Rame è costituito da elementi a sezione circolare in parete doppia, realizzati in acciaio inox 316L nella parte interna e la parte esterna in acciaio rame. Questi elementi sono dotati di innesto Maschio/Femmina a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio, disponibile su richiesta. Inoltre, l'intercapedine circolare è rivestita da lana di roccia ad alta densità. Le temperature massime di esercizio sono: 200°C con guarnizione e 600°C senza guarnizione.

AIRTEC ARABESCATO

Il sistema AIRTEC è costituito da elementi a sezione circolare, realizzati in acciaio inox 316L nella parte interna e acciaio inox 304 con verniciatura arabescata nella parte esterna. Gli elementi sono dotati di innesto Maschio/Femmina a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio, disponibile su richiesta. Inoltre, l'intercapedine circolare è rivestita con uno strato d'aria spesso 10 mm.

AIRTEC INOX/RAME

Il sistema AIRTEC è costituito da elementi a sezione circolare, realizzati in acciaio inox 316L nella parte interna e rame 5/10 nella parte esterna. Ogni elemento è dotato di innesto Maschio/Femmina a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente e nervatura per la fascetta di bloccaggio, disponibile su richiesta. Inoltre, l'intercapedine circolare è rivestita con uno strato d'aria spesso 10 mm.

TERMOTEC CUPRO INOX

Il sistema TERMOTEC è costituito da elementi a sezione circolare a doppia parete, realizzati in acciaio inox 316L nella parte interna e Cupro inox nella parte esterna. Ogni elemento è dotato di innesto Maschio/Femmina a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente, nervatura per la fascetta di bloccaggio fornita su richiesta e rivestimento con lana di roccia ad alta densità nell'intercapedine circolare. Le temperature massime di esercizio sono: 200°C con guarnizione in P1 e 600°C senza guarnizione in N1.

AIRTEC INOX/CUPRO

I componenti AIRTEC PPS CUPRO INOX sono realizzati con acciaio PPS nella parte interna e Cupro inox nella parte esterna, con un design circolare. Ogni componente è dotato di innesto M/F a bicchiere, guarnizione di tenuta a triplo labbro fornita separatamente, nervatura per la fascetta di bloccaggio su richiesta e rivestimento con uno strato d'aria spesso 10 mm nell'intercapedine circolare.

MONOPARETE VERNICIATO INOX 316 BLACK

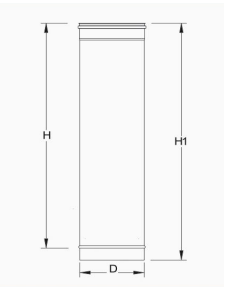

MONOTEC BLACK

Il sistema Monotec Black è composto da acciaio inox AISI 316 L verniciato e teflonato nero ad alta temperatura, ed è ideale per l'evacuazione dei fumi delle stufe a pellet.

SMALTATO 1,2 MM

I tubi in acciaio al carbonio sono caratterizzati da una saldatura laser perfetta, con rivestimento vetroso interno ed esterno cotto a 850°C. Questa struttura offre un'eccezionale resistenza alla corrosione causata dalla condensa di combustione, rendendoli idonei per l'evacuazione dei fumi per le stufe a legna.

LINEA FERTEC 1,2 MM PELLET

FERTEC 1,2 MM

Fertec 1,2 mm è il condotto per stufe a pellet realizzato in acciaio alluminato, sottoposto a saldatura laser. Al prodotto è conferita la classificazione V2 e garantisce un'eccellente resistenza alla corrosione causata dalle condense di combustione e riduce al minimo il rischio di incendiO da fuliggine.

FLESSIBILE INOX 316 COIBENTATA

FLEXCOI

Il condotto flessibile coibentato in acciaio inox AISI 316L è progettato con una struttura a doppia parete interna in acciaio inox AISI 316L e una parete esterna in acciaio inox AISI 304, con un isolamento interno di 25 mm in lana di roccia ad alta densità.

CAPPELLI

KOMI

La linea Komi è composta da comignoli ispezionabili dotati di apertura a ribalta, questo permette una semplice pulizia e manutenzione della canna, garantendo un ottimo tiraggio e facilitando l'azione di soccorso in caso di incendio. E' resistente ad alte temperature ed è possibile averlo in vari Ral.

MONOPARETE 316 OVALE

OVALTEC

La linea Ovaltec offre tutti i vantaggi di una canna circolare con la flessibilità di poter effettuare il recupero edilizio ritubando l'esistente. È particolarmente ottimale per l'intubamento di canne fumarie preesistenti a sezione rettangolare o quadrata.

CONDIZIONI GENERALI DI VENDITA

PREMESSO
Le seguenti condizioni di vendita e di consegna s'intendono integralmente accettate senza riserva con il conferimento dell'ordinazione e annullano tutte le precedenti.

CONDIZIONI

1. Le premesse costituiscono parte integrante del presente contratto.
2. Il presente accordo ha come oggetto i termini e le condizioni generali di vendita dei prodotti dal Fornitore all'Acquirente. Tali termini e condizioni regoleranno i singoli ordini di acquisto che l'acquirente emetterà nel corso della durata contrattuale.
3. Il presente contratto ha durata a tempo indeterminato, a decorrere dalla data della sua sottoscrizione, sino a sua rinegoziazione richiesta da una delle parti.
4. Oggetto del contratto è realizzare le forniture che i committenti richiedono, come da catalogo o con le caratteristiche di volta in volta contrattate.
5. I dati esposti in catalogo, le illustrazioni ed i disegni sono indicativi e non impegnano la società costruttrice ad una fedele esecuzione dei dettagli. È riservata inoltre la facoltà di apportare ai modelli quelle modifiche che l'esperienza ed i progressi tecnici suggeriscono.
6. Tutte le ordinazioni s'intendono conferite con la clausola "salvo approvazione della Casa" e le nostre offerte si intendono senza impegno e salvo il venduto.
7. I prezzi sono concordati da catalogo o negoziati in base alle caratteristiche del pezzo.
8. I nostri pezzi sono soggetti a variazioni in qualsiasi momento senza obbligo di preavviso alcuno in funzione di aumenti di costi delle materie prime, mano d'opera e quant'altro rientra nel ciclo di produzione della merce e comunque non sono impegnativi senza conferma da parte di SYNERGY s.r.l.
9. Non si accordano variazioni o modifiche quando sia già stata intrapresa la lavorazione.
10. I reclami per i vizi apparenti del materiale acquistato, naturalmente non dipendenti dal trasporto, o per non conformità dell'ordinanza trasmessa, devono essere fatti entro otto giorni dal ricevimento della merce, mezzo lettera raccomandata o tramite email certificata; dopo questo termine non saranno più ammessi. I materiali ritenuti difettosi dovranno, previa nostra autorizzazione, essere rispediti ai nostri magazzini in porto franco.
11. In caso di danni o mancanze è dovere dell'acquirente inoltrare al vettore, al momento della consegna, le opportune riserve sulla stessa bolla di consegna. Pertanto se su DDT o Fatture accompagnatorie non sarà indicata la dicitura "Con riserva di controllo" non si prenderà in considerazione alcuna contestazione per danni e/o ammanchi.
12. La merce s'intende sempre resa franco nostro magazzino. Qualora per speciali accordi la consegna sia stabilita franco destino, s'intende in ogni caso resa su autocarro non scaricata, perciò restano a carico del committente oneri e rischi relativi al discarico. La merce anche se venduta franco destino, viaggia sempre per conto e rischio del committente.
13. Se il termine di consegna non dovesse essere rispettato per qualsiasi motivo indipendentemente dalla volontà di SYNERGY s.r.l., il Cliente non avrà diritto ad eseguire nessun indennizzo o modifiche all'ordine conferito.
14. In caso d'inosservanza da parte del committente di una qualsiasi delle sue esposte condizioni e, in particolare, in ogni caso di ritardo o mancato pagamento totale o parziale delle somme dovute, la venditrice, si riserva azione legale e potrà ritenere decaduto di pieno diritto il contratto di vendita con completo esonero d'ogni altra fornitura in corso. Eventuali contestazioni non conferiscono al committente alcun diritto di differire i pagamenti.
15. La richiesta di reso dovrà pervenire entro e non oltre 30 dalla data di ricezione della merce mediante mail da inviarsi a resi@grupposynergy.com. I resi autorizzati si intenderanno "Franco magazzino presso le ns sedi". L'accredito del rimborso avverrà solo dopo accurato controllo di nostri addetti. Le richieste di reso che non rispetteranno i termini sopra indicati non saranno prese in considerazione.
16. I pagamenti devono essere adempiuti singolarmente per ogni singolo ordine di acquisto;
17. In caso di vendita fuori dal territorio italiano, la legge applicabile al contratto è quella italiana.
18. Per qualsiasi contestazione legale è espressamente convenuta la competenza esclusiva del foro di Cuneo.

11. In caso di danni o mancanze è dovere dell'acquirente inoltrare al vettore, al momento della consegna, le opportune riserve sulla stessa bolla di consegna. Pertanto se su DDT o Fatture accompagnatorie non sarà indicata la dicitura "Con riserva di controllo" non si prenderà in considerazione alcuna contestazione per danni e/o ammanchi.
12. La merce s'intende sempre resa franco nostro magazzino. Qualora per speciali accordi la consegna sia stabilita franco destino, s'intende in ogni caso resa su autocarro non scaricata, perciò restano a carico del committente oneri e rischi relativi al discarico. La merce anche se venduta franco destino, viaggia sempre per conto e rischio del committente.
13. Se il termine di consegna non dovesse essere rispettato per qualsiasi motivo indipendentemente dalla volontà di SYNERGY s.r.l., il Cliente non avrà diritto ad eseguire nessun indennizzo o modifiche all'ordine conferito.
14. In caso d'inosservanza da parte del committente di una qualsiasi delle sue esposte condizioni e, in particolare, in ogni caso di ritardo o mancato pagamento totale o parziale delle somme dovute, la venditrice, si riserva azione legale e potrà ritenere decaduto di pieno diritto il contratto di vendita con completo esonero d'ogni altra fornitura in corso. Eventuali contestazioni non conferiscono al committente alcun diritto di differire i pagamenti.
15. La richiesta di reso dovrà pervenire entro e non oltre 30 dalla data di ricezione della merce mediante mail da inviarsi a resi@grupposynergy.com. I resi autorizzati si intenderanno "Franco magazzino presso le ns sedi". L'accredito del rimborso avverrà solo dopo accurato controllo di nostri addetti. Le richieste di reso che non rispetteranno i termini sopra indicati non saranno prese in considerazione.
16. I pagamenti devono essere adempiuti singolarmente per ogni singolo ordine di acquisto;
17. In caso di vendita fuori dal territorio italiano, la legge applicabile al contratto è quella italiana.
18. Per qualsiasi contestazione legale è espressamente convenuta la competenza esclusiva del foro di Cuneo.
